Absolutely Magnetism-Free

Vulcan – the alternative to water softeners

Water is a valuable resource. However, hard water contains dissolved scale which will eventually build deposits in your pipes and appliances.

Every house owner should use an eco-friendly water treatment system in order to ensure their home is protected against scale and rust. This preserves the value of your home today and for the next generation to come.

Benefits of using Vulcan

- ▶ Reduces of scale deposits in the whole piping system
- ▶ Less time and effort on household maintenance and cleaning
- ▶ Reducing spotting on glasses, dishware and tiles
- ▶ Considerable savings on cleaning agents
- ▶ Filters, shower heads and basins stay cleaner
- ▶ Fulfil the Green Building standard for water treatment

Sprinklers and gardening systems stay clean and last longer. Less replacements are required.

Swimming pools are easier to maintain and pool filters stay cleaner. Chemicals and cleaning agents can be reduced.

Vulcan-Impulse-Technology

The Vulcan - Impulse - Technology treats the water with special electronic impulses that take away the adhesive power of the scale particles. Scale components are simply washed away with the water as a fine powder. Vulcan carefully dissolves already existing deposits. In addition, the Vulcan impulses generate a metal-carbonate protective layer that prevents rust and pitting corrosion.

Simple Do-It-Yourself installation

Vulcan is a Do-It-Yourself product and is easily installed within a few minutes without the need to cut the pipes. To install Vulcan you do not need any professional tools.

Place Vulcan at the main water supply - this is usually close to the water meter.

Fulfil the Green Building Standard

Vulcan is maintenance-free and does *not* change the water composition. It leaves calcium and magnesium in the water which are important minerals for the body.

Vulcan is the eco-friendly water treatment for green buildings and homes that aims to help building owners and operators be environmentally responsible and use resources efficiently.

Vulcan 5000 installed in a private house

Vulcan Prevents Scale and Rust

- ✓ Reduction of existing scale in the piping system
- ✓ Easy installation without cutting the pipe
- ✓ From 1/2" up to 40" pipe diameter
